GitHub: github.com/Nahuel7709 • LinkedIn: https://www.linkedin.com/in/nahuelmenichetti/

Full-Stack Developer specialized in TypeScript, building web applications end to end with React, Node.js, Express and PostgreSQL. Experience designing REST APIs, relational data models, authentication and role-based authorization, plus professional experience working in Agile teams with code reviews. Computer Science student at UADE (GPA 7.90).

Experience

LEB Entertainment

Web Developer Dic 2025 – Present

- Built and launched the company website on WordPress for an Argentine live music production company, handling setup, theme configuration and deployment.
- Wrote custom CSS and JavaScript to extend the theme beyond its defaults, adapting layout and interactions to the client's needs.
- Manage content, hosting and domain on an ongoing basis, working directly with the client to turn their requirements into concrete changes.

Globant

Web Developer (Junior) Oct 2024 – Oct 2025

- Frontend developer on an internal team project, working alongside backend developers, QA and a project manager, after completing Globant's internal React Academy.
- Built responsive UI components in React and TypeScript, integrating with REST APIs and handling state, routing and form validation.
- Participated in the full Agile/Scrum cycle: sprint planning, daily standups, code reviews and retrospectives.
- Wrote unit and integration tests with Jest and React Testing Library; used Git and pull-request workflows.

Education

UADE — Universidad Argentina de la Empresa (CABA, Argentina)

Bachelor's Degree in Computer Science (GPA 7.90) Oct 2022 – Present

Projects

Car Rental — Full-Stack Rental App

Repo: github.com/Nahuel7709/Car-Rental

Full-stack car rental app in TypeScript (React, Vite • Node.js, Express, PostgreSQL, Prisma), built through code-reviewed tickets with a senior engineer as mentor. JWT auth, role-based access, and bookings in a row-locking transaction preventing double-booking. Integration tests, CI, and deployed on Vercel, Render and Neon.

StayHub — Booking-style Accommodation Platform

Repo: github.com/Nahuel7709/StayHub

Accommodation booking platform, final project for Digital House: Java 21, Spring Boot, JPA and MySQL with a React frontend. JWT authentication, role-based access and overlapping-booking prevention.

Skills

Frontend: React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS, Vite
Backend: Node.js, Express, REST APIs, JWT authentication, Zod; Java (Spring Boot, Spring Security, JPA) (basic: NestJS)
Databases: PostgreSQL, MySQL, SQL; Prisma and TypeORM
Testing & Tooling: Vitest, Jest, React Testing Library, Git, GitHub, Docker, Postman, Swagger/OpenAPI (basic: CI/CD)
Methodologies: Agile / Scrum, code reviews, pair work
Languages: Spanish (native), English (B2)

Certifications & Courses

- **Digital House —** Professional Developer (2025), Full Stack Web Certified Programmer (2021–2022)
- **Udemy —** Mastering TypeScript (2025), JavaScript Pro: Advanced Concepts (2025), Next.js(2025)
